

Any Elite member may create their own song playlist to store in the Elite Music Library. Simply email James Molinari with a list of songs (title and artist included) that you would like in your playlist. Molinari will create a folder for any interested member that can be accessed in the Elite Music Library under the “Elite Members” category. That playlist will then be accessible to you anytime you have an internet connection (These songs are “streamed” when you listened to them, meaning the information is actually being transferred to your computer while you are listening. Because of this, a high speed internet connection is necessary for the songs to play continuously, without constant interruption. If the songs will not play without interruption, your internet connection is either not fast enough to stream the music, or your internet connection is experiencing too much traffic or a service interruption, and you should try again at a later time).
